Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's election with traverse of Invention II corresponding to claims 25-40 in the reply August 23, 2007 is acknowledged. The traversal is on the ground(s) that as indicated in the restriction requirement, inventions I, II, III, and IV are unrelated and that in the instant case, the inventions are not capable of use together and they have different designs, modes of operation, and effects. Also applicant alleges that the examiner has set forth contradictory bases for restriction by comparing Inventions II and III and inventions II and IV are related as combination and subcombination. However, the examiner of record would like to clarify that the unrelated inventions are groups [I, II] and [III, IV].

Furthermore, invention I is independent or distinct and is not capable of use together and has different designs, modes of operation, and effects. For example, invention I is drawn to a method of diagnostic imaging, invention II is drawn to a radiation imaging system, and invention III is drawn to a computer readable storage medium. This is not found persuasive because the fact that claim 1 performs a diagnostic imaging procedure, and since the claims limitations of "a radiation emitting system" and "a computer storage medium" are not located in the body of the claim or in the preamble. The examiner interprets such claim disclosure as merely a method of diagnostic imaging.

The requirement is still deemed proper and is therefore made FINAL.

However, in relation to comparing inventions II and III are related as combination and subcombination. Applicant has elected to amend claim 26 to further clarify the invention and such amendment renders moot the basis for the imposed restriction.

Claims 1-24 are withdrawn and claims 49-55 have been canceled from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 23, 2007.

Therefore, upon further consideration, the following new office action is provided to better indicate the different inventions and species being claimed in order to expedite the prosecution of this application.

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Figures 5, 6, 7 and 8 respectively.

The species are independent or distinct because the applicant expressly states on pages 5 and 6 of the specifications that Fig. 5 is a perspective view of one embodiment of a dynamic filter in accordance with the present invention, Fig. 6 is a perspective view of another embodiment of a dynamic filter in accordance with the present invention, Fig. 7 is a perspective view of another embodiment of a dynamic filter in accordance with the present invention, and Fig. 8 is a perspective view of another embodiment of a dynamic filter in accordance with the present invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John F. Ramirez whose telephone number is (571) 272-8685. The examiner can normally be reached on (Mon-Fri) 7:00 - 3:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian L. Casler can be reached on (571) 272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
